TO WHOM IT MAY CONCERN

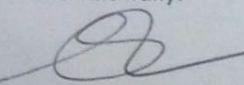

Centre for Agro-entrepreneurship and Sustainable Livelihoods Trust (CASL) is a youth community based organisation in our community that has been instrumental in various community development programmes in water, agriculture, environment, climate change and youth empowerment. We have given them 8 hectares land and they received funding from Global Environment facility Small Grants Programme-UNDP where they are carrying out their project on climate change mitigation and adaptation and also empowering young people in the community. We have collaborated in various tree planting activities in the community as well as clean up campaigns. Through their exemplary leadership and zeal for developing our community we coopted them as the youth representative in the Small Towns Water, Sanitation and Hygiene Project Steering Committee that was funded by Australian Aid through UNICEF and Action Aid Zimbabwe. They served in the committee beyond expectations. We also selected them to be part of the team that crafted the Mvurwi Local Environment Action Plan.

They also represented our community at different platforms locally and internationally with due diligence namely; Zimbabwe National Young Leaders Summit (2012), COMESA Youth Summit on Climate Change (2012), National Climate Change Response Strategy Consultations (2013), National Migration Policy Consultations (2015), SADC Regional Water Strategy IV Conference (2015), National Water Policy Conference (2015), Africa Youth Climate Change Conference (2015), 5th Climate Change and Development in Africa Conference (2015), and Global Network for Disaster and Risk Reduction Conference East and Southern Africa (2015).

Their project was awarded the National Young Farmer Innovation award by Zimbabwe Farmers Union at the National Young Agripreneurs Summit 2015.

We do not hesitate to recommend them for any opportunity to further develop and sustain our community.

Yours Faithfully,

DR. S. NYAKUDYA
TOWN SECRETARY
